Ganfeng Lithium
The Integrated Professional Lithium Producer
Company Overview

- Focus on Lithium products production, become leading integrated Lithium producer in China.
- Leading Lithium Metal producer in the world.
- Highly technology oriented, the only Lithium company in the world has the capacity to produce Lithium from both hard minerals and brine.
Company Overview - 2012

Employee: approx. 900 in 4 production sites

Sales revenue: USD 100 m

Export: 30%
Domestic: 70%

Transportation:
To Shanghai Port: 800km
To Guangzhou Port: 750km
To Nanchang Port: 150km

Company Overview - Business Structure

Ganfeng Lithium

Metal Division
Organic Division
Inorganic Division
Specialties Division

Major market served:
- Battery industry
- Pharmaceutical
- New materials
Metal Division

Major product lines:
- Lithium metal catalyst grade
- Lithium metal battery grade
- Lithium metal High purity grade
- Lithium Alloy
- Lithium foil

No 1 Lithium metal production worldwide in 2011
Advanced Technology in Li Foil Production
Lithium Metal Capacity

- Current capacity: 1000mt/y including all grades of Lithium metal.
- Building second Lithium metal in Yichun city which is in the separate grid networks, commissioning in the Q4 2013 with 500mt/y capacity.
Lithium Metal Export Distribution

- Canada
- U.S.A
- Japan
- Germany
- Turkey
- South Korea
- France
- U.K.
- Italy
- Israel
- India
- Singapore
Main Market for Battery Grade and High Purity Grade Lithium Metal

- Ganfeng is the key supplier to all types of Primary Lithium battery market in the world, including Saft, Energizer, etc.
- Lithium metal polymer battery for Electrical Vehicle.
- Different types of Lithium contented alloy.
Organic Division

Major product lines:
-N-butyl Lithium

Supply inside China and export to polymer and pharmaceuticals industries
Inorganic & Specialties

Major product lines:
- Lithium Chloride anhydride
- Lithium Carbonate Battery grade
- Lithium Carbonate High purity grade
- Lithium Hydroxide Battery grade
- Lithium Fluoride Technical grade
- Lithium Fluoride Battery Grade
Multiple Raw Material Supply

➤ Lithium brine
➤ Spodumene
➤ Lepitolite
➤ Recycled material from internal and external
➤ Lithium carbonate TG
Access to Lithium Resources with Low Cost

- Ganfeng owns 17.5% of International Lithium, a Canadian listed mining company who owns Lithium properties in Argentina, Canada and Ireland.
- Ganfeng has the option to convert the loan into 80% of the Mariana brine project in Argentina.
- Ganfeng has the option to buy up to 100% of the Avalonia Lithium mineral project in Ireland.
Mariana Brine Project

Located in the World Renowned Region Hosting Vast Majority of Global Lithium Production

MARIANA PROJECT
Claim Map
Extensive 160 km²

Unique Strategic Advantage

GanfengLithium
Mariana Brine Project
Avalonia Lithium Mineral Project

- Ganfeng has the option to acquire up to 100% after the Initial exploration report has been completed.
Company Overview - Quality Control

GanfengLithium is certified by:
ISO9001
Our Strength and Unique Technology

- Integrated production
- Recycling: green production and cost saving
- Flexible and fast reaction to market demand
- Highly committed and experienced management team.

Innovation
- Strong R&D capabilities
- 34 major patents until 2012
- Process improvement
- Tailor-made products capability

Unique technology
- Produce LiCl directly from brine
- Produce Lithium metal battery and high purity grades through unique distillation process
- Lithium foil production in the inert atmosphere
- Unique process for Lithium carbonate high purity grade
Strength-Integrated Production
Flexible and Cost Saving

More than 20 different Li products

Brine/Minerals → Primary Lithium chemicals

LiCl anhydrate
LiF Tech Grade

Li Metal-CG
Li Metal Ingot
BG
Li Metal Foil
BG

Down stream Li chemicals

Li Metal

Li Alloy
Organic Li
Li Hydrides

Li2CO3- BG
Li2CO3- HPG
LiF- BG
LiH2PO4-BG
LiOH.H2O- TG
Strength-Strong Product Chains

We have built up 3 major product chains

1. Brine → LiCl anhydrate → Li metal catalyst grade → N-butyl Lithium

2. Brine → Li2CO3-BG → Li2CO3-HPG → LiF - BG

3. Li Metal-TG → Li Metal-BG → Li Anode, Li foil, Li Alloy

Ganfeng Lithium
Unique Technology

1st production line in China in 2007 –Produce LiCl directly from brine

Brine
Mineral

Li2CO3-TG

LiCl Anhydrate

Li Metal

Remark: Gray arrow is the traditional route, green arrow is GanfengLithium route

1st line in China in 2009 –Produce Li2CO3- PG directly from brine

Brine
Mineral

Li2CO3-TG

Purified Li salt solution

Li2CO3-PG

Remark: Gray arrow is the traditional route, green arrow is GanfengLithium route
Unique Technology-Li Metal Battery and HP grade

Traditional route

Brine → Li2CO3 → LiOH → LiCl Anhydride → Li Metal-BG

GanfengLithium Route

Brine → LiCl Anhydride → Li Metal-TG → Li Metal-BG
Thank you
